Profile

As an accomplished software engineer with 5+ years of hands-on experience, I specialize in crafting cutting-edge solutions using JavaScript, TypeScript, and various frameworks like React, React Native, Next.js, Vue, Nuxt.js, and Angular.

My proficiency extends to CSS frameworks like Tailwind and Bootstrap, along with pre-processors such as SCSS and Sass, enabling me to create visually stunning and adaptable user interfaces that exceed design standards and accessibility requirements.

Driven by a passion for innovation and excellence, I eagerly tackle new challenges, solve complex problems, and deliver impactful software solutions that delight users.

Skills

- **Frontend:** JavaScript, TypeScript, React, Next.js, Redux, Vue, Nuxt.js, Vuex, JQuery, Tailwind
- **App Development:** React Native, Ionic, Capacitor
- **Backend:** Laravel, Django, MySQL
- **Tools:** Git, Docker, Photoshop, Figma, XD, MS Word, MS Excel

Work experience

2023 – present
Dhaka, Bangladesh

Senior Software Engineer
UMR LABS

I am proud to serve as a Senior Software Engineer at UMR LABS. UMR LABS a professional technology services provider for small and large businesses worldwide. Minority and women-owned with locations in the US-UK-BD.

Work experience

2022 – 2023

Dhaka, Bangladesh

Software Engineer

IQuantile

During my tenure at IQuantile as a Software Engineer, I honed my expertise by actively contributing to a myriad of web applications. My role involved collaborating on various projects, where I leveraged my skills to enhance functionality and streamline user experiences.

2018 – 2022

Dhaka, Bangladesh

Software Developer

JoulesLabs

During my time at JoulesLabs as a software developer, I worked on various projects involving web and mobile applications, with a focus on eCommerce, crowdfunding, and management systems. I played a key role in optimizing these platforms for seamless user experiences and business success..

2017 – 2018

Dhaka, Bangladesh

Web Developer

Kodeeo

I've had the privilege of serving as a web developer at Kodeeo, where I also completed an enriching internship. My experience at Kodeeo allowed me to refine my skills and gain invaluable hands-on experience in the field of web development.

Projects

Sentinel EP

Sentinel Executive Protection offers on-demand security services, boasting a curated team of experts in security, technology, and logistics. As the lead Software Engineer, I'm currently leading a project involving web and mobile applications. My role includes managing development, guiding the team, and ensuring the delivery of an innovative solution.

• TypeScript • Vue • Vuex • Tailwind • Laravel

Pintoe

Pintoe, a dynamic social media platform available on web and mobile, offers a range of features for both free and premium users. As lead Software Engineer, I oversee development for both platforms, guiding the team to deliver innovative solutions. After a successful in-house 1st version release, we're now advancing to the 2nd version to enhance user experience and functionality.

• Next.js • Redux • TypeScript • Tailwind • Ionic • Capacitorjs • Laravel

Webaccess

Webaccess AI provides a comprehensive solution for web accessibility, meeting WCAG and ADA guidelines for EU, USA and other countries. Built with JavaScript, TypeScript, CSS, and Webpack. I led its development from start to finish, ensuring that both the 1st and 2nd versions were successfully delivered.

• JavaScript • TypeScript • CSS • Webpack • Laravel

Bully-Hub

Bully-Hub connects responsible breeders with loving families, prioritizing high breeding standards and dog welfare. As a frontend team lead, I ensured the project's success by guiding and supporting the team.

• JavaScript • jQuery • Bootstrap • Laravel

Projects

Guayllas Magic Cleaning

Guayllas Magic Cleaning was a passion for cleaning the world one customer at a time. I oversaw the frontend team's development efforts, ensuring a high-quality product was delivered through effective guidance and coordination.

• JavaScript • TypeScript • Vue • Vuex • Tailwind • Laravel

Quantibly

Quantibly, an innovative SaaS solution for the Social Sector, offers comprehensive support for critical functions like data collection, fundraising, financial management, and customer engagement. As the lead Frontend Engineer, I've driven its development, ensuring seamless integration and optimal performance to meet our clients' diverse needs.

• JavaScript • TypeScript • Vue • Vuex • Tailwind • Django

Crowdfundly

CrowdFundly is a dynamic SaaS project dedicated to crowdfunding, enabling users to create fundraising platforms, launch campaigns, and secure funding. With technologies like Laravel, Nuxt.js, Scss, and Docker, we ensure robustness and scalability. As the lead Frontend Developer for 1.5 years, I've driven frontend development forward since the project's inception.

• Nuxt.js • Vuex • Tailwind • Multi-Language • Subdomain & Custom Domain • Laravel • Wordpress Plugin

Keeno

Keeno is an eCommerce application. I have designed the full application with HTML and SCSS in the Laravel Blade. Here I have worked in following criteria:

• JavaScript • jQuery • Bootstrap • SCSS • Laravel
